1. Purpose and scope

The purpose of this procedure is to handle for customer complaint when is issued complaint point a view of quality & environment from customer. This procedure is defined each role to solve customer complaint.

2. Apply scope

All of complaint issue from customers.

3. Definition of terms

3.1 Customer complaint

Quality & environment issue of the shipped product to the customer.

(ex/ Escape of the defect product, Shipped product's defect, All of defect issue)

3.2 Root cause

Occurrence cause of the issued defect.

3.3 Affect lots.

Suspected range of the defect based on working history or production data.

3.4 Containment action

The temporary action in order to prevent the delivery of additional defects to the customer at customer issue. These actions are made before root cause define.

3.5 Permanent action.

The permanent action in order to prevent reoccurrence defect issue from customer. Permanent actions are made based on actual root cause.

3.6 8D Report

As the efficiency analysis report form. It is composed that is 1D ~ 8D.

1D: Team formation

2D: Problem description

3D: Containment action

4D: Root cause define

5D: Corrective actions

6D: Verification of effectiveness

Confidential

7D: Prevent recurrence

8D: Approval

3.7 Customer claim

Compensating for customer damage due to defective products.

3.8 Customer complain

There is no monetary compensation for defective products., but analysis and index management are required.

5. Responsibility and authority

5.1 QM head

1) QM leader is responsible for solving customer quality issues.
2) QM leader should inform immediately the customer quality issue to the all of related department to solve customer quality issue.
3) QM leader should survey affect range for customer damage minimize. And then, report them to the customers.
3) QM leader can request corrective action to the relevant department for customer complaint, and the head of the relevant department is responsible for taking the corrective actions.
4) QM leader is responsible for feasibility review of submitted corrective actions from relevant department. And should implement monitoring whether the corrective action is applied mass production.

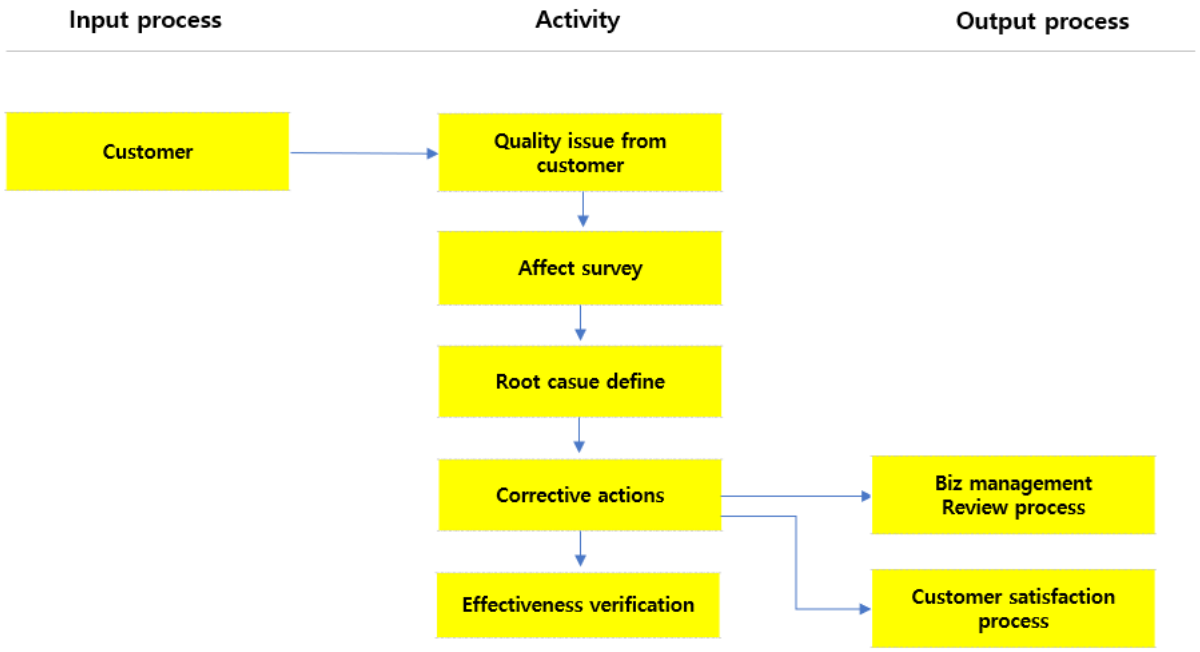
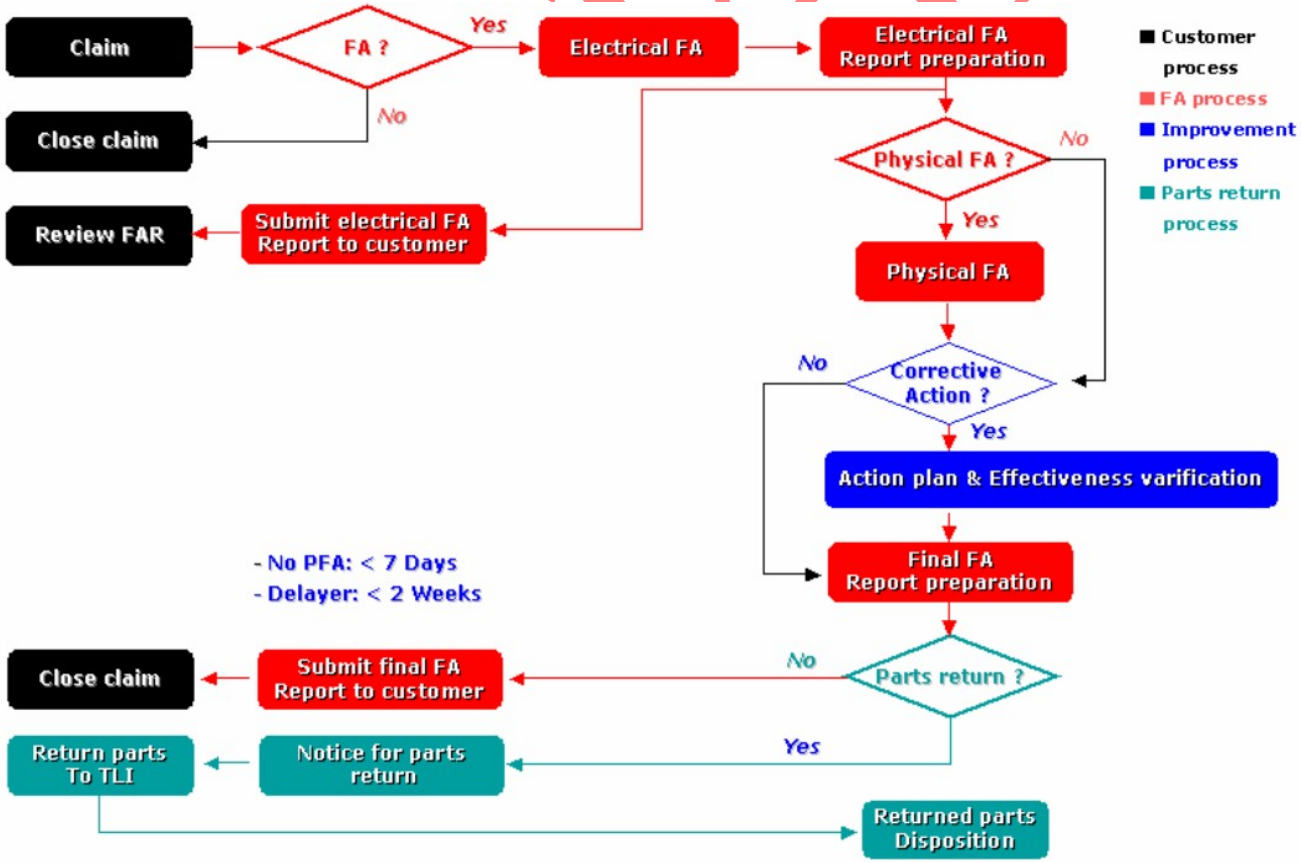
6. Process mapping



6.1 Fail analysis process



In process	Input	Activity	Output	Out process	Freq.	Review	Approval
-.	-. Customer claim letter	-. If the quality trouble is occurred from customer, QM leader should get related information in detail from customer. And then, he should release them to the relevant department for fail analysis. -. QM leader should survey affect LOT range immediately for customer damage minimize, and have to report them ASAP. -. QM leader should register the defect history on the RMA Sheet.	-. RMA Sheet	N/A	Occurred	Charged person	CQO
-.	-. RMA sheet	-. Production, technical engineering, and subcontractor analysis the root causes of customer defect materials. -. QM leader report 4D report to customer if the root cause is reasonable. -. QM leader should review root cause analyzed from them. And, if it is reasonable, request corrective actions to prevent reoccurrence.	-. FA Report -. 4D Report	N/A	Occurred	Charged person	CEO
-	-. FA Report -. 4D Report	-. If it is completed that submit FA or 4D report to the customers, QM leader should prepare corrective action and preventive actions. -. If the corrective & preventive action is prepared, QM leader implement effectiveness verification on the mass production. -. If 8D report is prepared, QM's charged person should submit them to the customers.	-. 8D Report -. Final FA report	N/A	Occurred	Charged person	CEO

Confidential

-	-. 8D Report -. Final FA report	-. If the customer request additional evaluation or verification regarding to the submitted materials, QM's charged person should follow up customer request for customer satisfaction. -. QM's charged person update defect responsibility, TAT, all of information on the RMA sheet	-. Update materials -. Update RMA sheet	-. Nonconformity management process -. Biz management review process	Occurred 1x/Month	CQO	CEO

Confidential

7. Fail analysis TAT

RMA Case	Description	TAT
Urgent	-. Customer sampling inspection defect -. Customer reliability inspection defect -. Field issue	4 days (working day)
Normal	-. Customer's production line issue except above.	7 days (working day)
Note: in case of FA TAT, the customer's standards come first.		

Note: RMA (Return merchandise authorization)
